

ABSTRACT OF THE DISCLOSURE

Oral compositions for treating and/or preventing gingivitis are provided. The compositions include at least one NSAID, thymol, methyl salicylate, menthol and eucalyptol. The NSAID, thymol, methyl salicylate, menthol and eucalyptol are present in the composition in synergistically effective amounts. The compositions can be provided in the form of, e.g., mouthwashes or toothpastes, and are not only effective against gingivitis, but can also prevent or treat halitosis and other detrimental conditions of the oral cavity.
